

Florida Debt Resolve Launches FDR Mobile® - Debt Settlement Clients can Track the Progress of their Debt-Plan, Communicate/View New Information, and Receive Text Alerts

Florida Debt Resolve releases a mobile application that will provide real-time communication with its clients. The app is available for iPhones at this time; all other device users may bookmark the optimized site for easy login and viewing. The app is free for all Florida Debt Resolve Clients.

Tampa, FL ([PRWEB](#)) May 25, 2011 -- In an effort to serve their clients more effectively and efficiently, Florida Debt Resolve has launched a mobile account service, FDR Mobile®. This service provides a safe and secure way for online FDR customers to access their account for free. Clients can review the progress of their debt settlement plan even when they're away from their computer—on vacation, having dinner with friends, in the checkout line—anytime, anywhere, simply using their mobile device. Mark Capaz, Managing Member and Founder of Florida Debt Resolve, says “This service will allow Florida Debt Resolve to communicate with its clients and keep them informed of the progress of their accounts in real-time. Lack of communication leads to more stress for the clients and less effective debt settlement results.”

FDR Mobile® offers an optimized view for all Internet enabled phones. An icon app is available for iPhones at this time; all other device users may bookmark the optimized site for easy login. Using a mobile device, one simply logs in at <https://fdresolve.basecamphq.com/mobile/#/projects> and can view the latest notes and progress of their settlement plan as well as communicate any important messages or new information.

Mark Capaz says, "Florida Debt Resolve has experienced success due in large part to our individualized settlement plans and personal approach to servicing each client. We are not one of the national companies you will see advertising on television; we rely on referrals from our network of professionals. Each person we work with is treated as an individual with unique circumstances. Technology can make our lives easier or more difficult if we allow it. FDR Mobile® was developed to compliment the unique plan and personal relationships we have with each and every client while making difficult times as comfortable as possible."

The app was released on 5/15/2011 and Florida Debt Resolve expects to release upgrades as needed.
