Rebecca Schwartz of Raleigh, NC never thought that she would consider it, until curiosity got the best of her and she filled out a simple online form. Before she knew it, she discovered her secret to beating the recession, and being able to provide for her family while at home with her three children.

I read Rebecca's blog last month and decided to feature her story in our weekly consumer report. In our phone interview she told me her amazing story. "I actually make about \$15,000 to \$17,000 a month working from home. It's enough to comfortably replace my old job income, especially considering I only work about 15-18 hours a week from home right now.

Working online has been a financial windfall for Rebecca, who struggled for months to find a decent job but kept hitting dead ends. "I lost my job shortly after the recession hit, I needed reliable income, I was not interested in the "get rich quick" scams you see all over the internet. Those are all pyramid schemes. I just needed a legitimate way to earn a living for me and my family. The best part of working online is that I am always home with the kids, I save a lot of money."

I asked her about how she started her remarkable journey. "It was pretty easy, I actually received an email that sparked my interest, so I went to the site, filled out a short form and signed up for a work at home program where I got instant access to everything! Since they offered a 365 Day Money Back Guarantee - I figured I really had nothing to lose. So, I started the program and within four weeks I was making over \$5,000 a month. It's really simple, I am not a computer whiz, but I can use the internet. I followed the instructions, and I don't even have to sell anything and nobody has to buy anything. This is a very stable system and they are recruiting, you should try it."

Consumers purchase Billions and Billions of dollars worth of products each year online. Every time people use the internet, go on facebook or do a search, someone is making money. This program will teach you how to get a piece of this money and free yourself from the 9-5. The internet economy has grown by leaps and bounds in the recession, so why not take advantage of the gold rush? There are plenty of scams on the internet claiming you can make \$50,000 a month, but that is exactly what they are... scams. From my conversation with Rebecca, "I am making a good salary from home, which is amazing, under a year ago I was jobless in a horrible economy. I thank God every day that I signed up for this program."

Has anyone tried this yet? Looks promising.

Keri says: 4:44 PM July 10, 2011
@John, I'm using it now and it's working pretty well actually! I paid a dollar for shipping, got it in a few days, signed up for my account and have been cranking along ever since. My first week I made a whopping \$288 and the second week I doubled that then it kinda snowballed to \$500 a day! I'm gonna grow this puppy as big as I can. Here's a screen shot of my stats, my wife is in shock.

Is this for real? I tried one thing and it didn't pan out. I made about \$500 a month but that was 2 years ago. I'm going to give this a shot.

I think this is great and will come in really handy right now. I'm not the best computer user but I think I can post links!!! :)

Does anyone know if you have to have any programs or a certain computer to make this work?

Trey P says: 9:58 PM July 10, 2011
Hi Wanda,

Hey Wanda, the answer is No. Any computer you have will work, I currently use this system on an old laptop and it works great. You just need the kit that the author named in the article.
