The World Law Group 

Nonprofit: 1-10 employees; Legal Services Industry
September 2011 – November 2011 (3 months) | Austin, TX

In 1998, partners from five of the world's leading international law firms met to discuss the impact of the Internet on the provision of legal services. Out of that meeting grew several software prototypes for simplifying the most common legal issues, entering them into complex database delivery systems and creating the first automated system to address over 4000 common legal issues and problems.

Today we're helping to fill the need for understandable and efficient legal solutions. In addition to an expanding database, our systems automatically re-route designated issues to our global law team when necessary, providing thorough, up-to-date advice on commonly-faced legal issues in over 26 international jurisdictions including the United States. We put the resources of a global law firm to work for you.

Our founding shareholder board included leading international lawyers from the U.S. and abroad. The board worked close with our global team of Czech and Finnish computer programmers, British software analysts, and Internet systems specialists from the U.S., Finland and Japan. See members from the board's initial composition below.

Corporate Sales

Global Client Solutions 

Partnership: 51-200 employees; Banking Industry
July 2004 – August 2011 (5 years 2 months) | Tulsa, Oklahoma Area

Global Client Solutions (Global) is one the largest account management companies in the United States. Global has earned a reputation for supplying some of the highest quality products and best customer service in the industry. Consumers and companies alike have benefited greatly from Global's modern account management products. Global has developed and implemented its account management services specifically for the purpose of debt resolution, seeking to set the stage for consumer success in these activities.

In 2003 Global introduced its revolutionary Special Purpose Account (SPA) savings solution to the debt resolution industry as it creates total separation between the consumer's funds and the debt resolution companies. Global works with the consumer to help administrate payments in and disbursements out of their SPA and has no legal affiliation with any debt settlement company. Global enables consumers to accumulate and control their own funds within their SPA that is then used to disburse funds to the consumer's creditors. Competing service models, such as trust and self-held accounts, either significantly limit a consumer's control over the funds or do not effectively help consumers control their spending patterns. In addition, the SPA model creates transparency for a debt resolution company by providing view only access to the account balance to ensure that sufficient funds exist before attempting to execute a settlement.

2nd [Wayne E. Bridgeman II](#), Corporate Trainer, Global Client Solutions worked directly with Jennifer at Global Client Solutions

"I have worked with Jennifer Stewart since 2004 and can say with the utmost authority that you will not find a more dedicated member of a team. Jennifer is warm and courteous which allows her to establish rapport with potential clientele easily. Her concern and genuine care is also fostered in the relationships with established clientele that goes above and beyond what most people are willing to put into their business relationships.

Jennifer's professionalism has been on display for nearly a decade at every trade show I have both held and spoken at. She is a terrific representative for the companies she has worked for, promoting loyalty to the products and people she is there for. Her work ethic is apparent, knowledge of product and industry trends above-par and her attitude is stellar. She is a positive person to be around in any setting.

I would recommend Jennifer in any capacity. I've seen her play a central role in the industries we have worked in with regards to fostering connections in competing communities and establishing a loyal client base in each because of her abilities, attitude, competence and trustworthiness. She will be an asset to any company she works for." *March 6, 2012*
