

About Us

Get to know who we are

In 1998, partners from five of the world's leading international law firms met to discuss the impact of the Internet on the provision of legal services. Out of that meeting grew several software prototypes for simplifying the most common legal issues, entering them into complex database delivery systems and creating the first automated system to address over 4000 common legal issues and problems.

Today we're helping to fill the need for understandable and efficient legal solutions. In addition to an expanding database, our systems automatically re-route designated issues to our global law team when necessary, providing thorough, up-to-date advice on commonly-faced legal issues in over 26 international jurisdictions including the United States. We put the resources of a global law firm to work for you.

Our founding shareholder board included leading international lawyers from the U.S. and abroad. The board worked closely with our global team of Czech and Finnish computer programmers, British software analysts, and Internet systems specialists from the U.S., Finland and Japan. See members from the board's initial composition below.

We're happy you are joining us here at World Law Group and we look forward to providing you quality debt settlement and solution information in a new and exciting attorney protected format!
