World Law Debt Settlement focuses specifically on the process of helping our clients become debt free. Our service provides you with a straightforward assessment of your legal rights and all your options allowed by law. When you use World Law Debt Settlement, you don't have to make a trip to a law office; rather, you receive debt information according to your schedule, saving you precious time.

In 1998, partners from five of the world's leading international law firms met to discuss the impact of the Internet on the availability of legal services. From that meeting grew several software prototypes for streamlining the most common legal issues, and compiling them into complex database and delivery system. Thus the first automated system to address over 4,000 common legal issues was created at worldlawdirect.com.

Today we're helping to fill the need for efficient debt settlement legal solutions. In addition to an expanding searchable knowledge database, our systems automatically re-route designated issues to our global law team when the need arises. We provide thorough up-to-date advice on commonly-faced legal debt issues in over 26 international jurisdictions including the United States. We put the expertise and resources of a global debt law firm to work for you.

Our founding shareholder board included leading international lawyers from the U.S. and abroad. The board worked closely with our premiere global team of Czech and Finnish computer programmers, British software analysts, and Internet systems specialists from the United States, Finland and Japan.
