About Rescue One Financial

Real Hard Working People Helping Real Hard Working People to Get Out of Debt.

Rescue One Financial has helped thousands of Americans drowning in debt for over seven years. And today, we continue offering debt settlement as a smart alternative to credit counseling, debt consolidation and bankruptcy, working harder than ever to do business the right way for consumers.

We're a company that truly cares about our clients—proud to represent you and earn your trust every day, while fully complying with the recent FTC advance-fee ban, plus all other laws governing the financial industry.

Unlike many companies that skirt these new laws, we are not attorney-based. We use no retailers. We present no upfront costs. And we charge no up front enrollment fees.

Instead, we're here to educate people on **all** of their debt relief options, taking them step by step through the entire process to achieve their goals. Every file is thoroughly underwritten to ensure qualification for our program. Then, negotiating directly with creditors, our staff of skilled, attentive professionals can often help consumers resolve their debts in a few short years, potentially saving them thousands, and putting them in greater control of their future.

In fact, we're so confident about our performance that we offer a 100% money-back satisfaction guarantee.

Knowledge. Integrity. Exceptional service. That's what today's debt-conscious consumers want. And that's what Rescue One Financial delivers.
