Welcome

About one out of every five U.S. households owe more on credit cards, student loans, and other debts not backed by collateral than they have in savings and other assets. The average consumer holds around \$20,000 worth of credit card debt and pays close to \$400 a month toward that debt. With statistics like these it's no wonder why thousands of American's are falling victim to credit card companies. While increasing debt loads and bills may cause anxiety and overwhelming stress, there are solutions.

The Debt Relief Bureau recognizes the need to help educate and research debt relief companies to provide honest and non- biased information to consumers. Choosing a debt relief company is indeed a challenge in these hard economic times; yet, having a strong non-biased 3rd party advocate on your side results in a successful financial future.
