Morgan Drexen Integrated Systems supports attorneys nationally who are bridging the gap between collectors and debt resolution attorneys with cutting edge automated platforms.

Morgan Drexen has successfully assisted attorneys in making over \$80 million in payments to creditors nationwide.

Morgan Drexen is an industry leader in providing integrated support services to attorneys who provide alternative programs to assist their clients in preventative bankruptcy. The Preferred Creditor Program (PCP) makes it simple for you to collect funds more efficiently, with no added expense and less effort. After setting up your Preferred Creditor account ID, your accounts will be flagged in attorney databases nationwide and our systems will check the status of funds for you every day.

When your accounts are ready to be settled, attorney offers are generated and automatically sent to you for approval. Payments are sent overnight within 5 days of approved offers.

- Efficient and cost-saving system.
- Bypass outstanding legal fees, if any. You will also reduce much of the time traditionally spent by your collectors, calling and searching for debtors in hopes they have funds to pay.
- The attorneys involved in the Preferred Creditor Program do not wait for fees to be paid first or funds to accrue.
- Eliminate accounts being overlooked or "lost in the shuffle" by participating in monthly secure database matching to ensure that you collect from as many of your accounts as possible.

Morgan Drexen's Automation Platform combines a nationwide attorney network with state of the art software automation, making the debt settlement process fast, efficient, and cost effective for both debtors and creditors.
