A Realistic Business Debt Plan. As Featured On CBS, FOX & MSNBC.

www.CompassDebt.com

(I-Newswire) February 23, 2010 - Due to over \$395 billion in delinquent credit card payments, debt settlement has become one of the fastest growing sectors in business startups today. Our full service net branch opportunity provides no start up fees and a fully integrated CRM software lead tracking system to allow brokers to focus on their core business of sales so we can handle the customer service.

While so many businesses are struggling to make ends meet, our debt settlement branch offices are growing at an enormous rate due to the decline in the economy. This allows savvy business men to capitalize on debt reduction services while providing a valuable service to clients who are behind on payments or unable to qualify for bankruptcy due to the new credit counseling requirement of 2005.

As of October 17, 2005 all Americans seeking bankruptcy must complete a credit counseling program. The problem with this is that so many people are unable to afford the monthly payments in a credit counseling program, and must seek debt settlement. Debt settlement is the process of making payments to a savings account while attorneys negotiate on your behalf with your creditors to reach a settlement amount. Many companies out there operate without attorneys which is illegal in many states, says Michael Hart, CEO of DebtManagementGuys.com

While we provide debt management programs providing interest rates as low as 0% depending upon the creditor through DebtConsolidationGuys.com, debt settlement is a growing business due to the state of the economy and the 10% + unemployment rate.

DebtManagementGuys.com has a nationwide attorney backed network where attorneys in each state negotiate with creditors for settlements, some as low as 10% of the original amount. With no startup fees and an aggressive commission at 9% of the debt amount, this allows companies to recoup their investment quickly while building a residual income and providing a valuable service for people in financial hardship. "Many debt settlement companies have gotten a bad name due to not disclosing the key facts," says Michael Hart, CEO of DebtManagementGuys.com. "Our goal is to educate consumers on their options so they ultimately can make an informed decision." Debt settlement does initially have a negative impact upon your credit score initially since 35% of your credit score is based upon your payment history, but 30% of your credit score is measured by your debt to income." This is why its so helpful to reduce debts in 4 years or less and then focus on rebuilding your credit," says Hart.

Whether you're an established debt settlement company that simply wants to earn more on each file or a mortgage broker interested in turning your unqualified borrowers into a healthy revenue stream, we have the opportunity for you: You'll earn at least 9 points on each transaction. You'll get all the support and training you need. Getting set up is easy...you don't need a license and you can be up and turning a profit within 24 hours. Not to mention you'll be saving your clients an average of 50% of their debt and you'll reduce their monthly payments in about half--all with out charging a single penny in upfront fees.

How Do I Get Started? Call us directly at and ask to speak with an Account Executive or fill out our form at <http://www.debtmanagementguys.com> or email affiliates@debtmanagementguys.com Approvals typically take 24 to 48 hours. Once you're approved you may start doing business immediately. Call Today At: 678.561.3328
